Dimension shown in **inches** (bold) and millimeters.

SCE-V Series seals compress 60% and expand 25% from the nominal dimension after installation.

IMPORTANT NOTE: If the actual concrete joint opening is less than the specified nominal dimension (this may occur in hot summer months) then the install will be difficult. Do not use a smaller seal size because it may not accommodate wider openings during cold winter months. Either wait for colder temperatures (joint opens) to install or contact MM Systems for alternate seal options.
